PROFESSIONAL SUMMARY

Aspiring Full Stack Developer skilled in HTML, CSS, JavaScript, React, Node.js, and Express.js. Built and deployed web applications integrating REST APIs, MongoDB Atlas, and Google Gemini API. Eager to contribute to real-world projects while strengthening full-stack development skills.

EDUCATION

Bachelor of Computer Applications (BCA) 2025 – Present
Eternal University, Himachal Pradesh | CGPA: 8.32/10
Class XII | Govt. Sr. Sec. School, Matroo | 86.8% 2025
Class X | Govt. Sr. Sec. School, Matroo | 76.14% 2023

PROJECTS

Student Feedback Manager (MongoDB Full Stack App) Live Demo | GitHub
HTML, CSS, JavaScript, Node.js, Express.js, MongoDB Atlas, Mongoose

- Built a full stack app where students submit their name, rating and comment; the frontend sends the data with the Fetch API to Express.js REST endpoints (POST and GET /feedback).
- Designed a Mongoose schema with required-field validation and stored all feedback in MongoDB Atlas; added a page that fetches and displays every submission.
- Served the frontend from the Express server, kept the database URI in environment variables (excluded from Git) and deployed on Render.

Ask Gemini (AI Question-Answer App) Live Demo | GitHub
HTML, CSS, JavaScript, Node.js, Express.js, Google Gemini API

- Built a web app where users submit a question and receive an AI-generated answer; the frontend sends a POST request with the Fetch API to an Express.js endpoint.
- Developed the Node.js/Express backend that validates the request, calls the Google Gemini API through the official SDK and returns the answer as JSON.
- Added input validation, a loading state and error handling in the UI; kept the API key in environment variables (excluded from Git) and deployed on Render.

Myntra-Inspired Shopping Website Live Demo | GitHub
React, React Router, JavaScript, CSS, Axios, REST API

- Built a multi-page fashion store in React with React Router (category pages and product details); loaded product data from the DummyJSON REST API using an Axios instance, with loading and error states.
- Implemented cart and wishlist with Context API and a custom hook: quantity controls, running totals, and data saved in localStorage.
- Added a debounced search bar and a responsive layout using CSS media queries.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, React Router
Backend: Node.js, Express.js, REST API Development
Database: MongoDB, MongoDB Atlas, Mongoose
API Integration: Fetch API, Axios, JSON, Google Gemini API
Programming Languages: JavaScript, Python
Tools & Deployment: Git, GitHub, VS Code, Postman, dotenv, Render
Core Concepts: CRUD Operations, HTTP Methods, Form Validation, Error Handling

ACHIEVEMENTS & LEADERSHIP

- Best Volunteer, NSS Camp
- District-Level Sports Medalist
- 1st Prize, Painting Competition

CERTIFICATES

- **YFS — Supply Chain Intern:** Gained hands-on experience in logistics operations and cross-team coordination, strengthening my teamwork and communication skills.
- **CodeChef – Certificate of Completion:** Completed all practice problems of 500 difficulty rating.
