PROFESSIONAL SUMMARY

BCA student and aspiring Full Stack Developer who has built and deployed three web applications: an Express.js REST API with MongoDB Atlas, a Google Gemini API integration, and a multi-page React store using Axios, Context API, and localStorage. Hands-on with React, JavaScript, Node.js, Express.js, REST APIs, and deployment on Render and Vercel.

EDUCATION

Bachelor of Computer Applications (BCA) 2025 – 2028 (Expected)
Eternal University, Himachal Pradesh | CGPA: 8.32/10

Class XII | Govt. Sr. Sec. School, Matroo | 86.8% 2025
Class X | Govt. Sr. Sec. School, Matroo | 76.14% 2023

PROJECTS

Student Feedback Manager Live Demo | GitHub
HTML, CSS, JavaScript, Node.js, Express.js, MongoDB Atlas, Mongoose

- Developed Express.js REST endpoints (POST /feedback returns 201 Created; GET /feedback returns all entries) that store student name, rating, and comment in MongoDB Atlas using a Mongoose schema with required fields.
- Integrated a vanilla JavaScript frontend using the Fetch API, async/await, and try/catch error handling; configured Express to serve the static frontend so the app runs as one service.
- Deployed on Render with the database URI stored in an environment variable (.env excluded from Git).

Ask Gemini (AI Question-Answer App) Live Demo | GitHub
HTML, CSS, JavaScript, Node.js, Express.js, Google Gemini API

- Built a POST /ask-gemini endpoint in Express.js that validates the question (returns 400 if empty), calls Gemini through the Google GenAI SDK, and returns the answer as JSON.
- Designed frontend loading and error messages and implemented server-side error logging with a generic 500 response.
- Secured the Gemini API key in an environment variable (.env excluded from Git) and deployed the app on Render.

Myntra-Inspired Shopping Website Live Demo | GitHub
React, React Router, JavaScript, CSS, Axios, REST API

- Created a multi-page React app with React Router (category pages, product details by ID, cart, wishlist, 404 route) that fetches product data from the DummyJSON REST API through a shared Axios instance.
- Implemented cart and wishlist with Context API and a custom useCart hook: quantity controls, derived totals, and localStorage persistence with safe JSON parsing.
- Handled loading, error, and empty states, and used effect cleanup to ignore stale API responses.
- Applied a 500 ms debounce to search input, styled responsive layouts with CSS media queries, and deployed the app on Vercel.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Router, Context API, Responsive Design
Backend: Node.js, Express.js, REST API Development
Database: MongoDB, MongoDB Atlas, Mongoose
API Integration: Fetch API, Axios, JSON, Google Gemini API
Programming Languages: JavaScript, Python
Tools & Deployment: Git, GitHub, VS Code, Postman, dotenv, Render, Vercel

EXPERIENCE

Supply Chain Intern | YFS

- Coordinated across teams to support day-to-day logistics operations.

ACHIEVEMENTS & CERTIFICATIONS

- CodeChef – Certificate of Completion: solved all practice problems at the 500 difficulty rating
- NSS (National Service Scheme) – 2-Year Certificate
- YFS – Supply Chain Certificate
- Best Volunteer, NSS Camp
- District-Level Sports Medalist
- 1st Prize, Painting Competition
